Abstrak

A study on habitat and food preference of *Philemon buceroides* in Moyo island, West Nusa Tenggara was conducted in April 1999 until July 1999. The aim of study is to explore the diversity and composition of plants and foods preferred by *P. buceroides* in its nature habitat. The results from this study will be very valuable in providing information and managing its conservation in both nature and or in man made habitat (in-situ and ex-situ).
