Abstrak

In generally narcotic and phsycotropics can be said good subjects is natural or syntetycs able to give stimulant effects should be use. The problem will be arose when someone consumes them without prescription from the doctor; it means consumed more than needed. The addiction of narcotics and phsycotropics has been taken in law on Undang-undang No.5 tahun 1995 dan No. 7 Tahun 1997.

Ocurring both of the constitutions on above, it is not less the narcotic and phsycotropics addictions but make them to be increase. It can be looked up in all of the narcotics prisoners in indonesia. Those can be found on mass media, cause of the conditions, the writer interest to knowing how the process of the addiction of narcotic and phsycotropics has been done. So he has been done the research to three of narcotic prisoners to know them how they are addicted to narcotic and phsycotropics.

The research has been done by qualitative method and interview to set many data. The interview had been taken to SP, TR and DS. The research of research is showed many conditions that is influence and be the criminogenetics factor of the narcotic and phsycotropics adductions. From the three prisoners can be know that the process should be take on many factors such as social environment, economics and friendship.
