Abstrak

The aim of this research was to measure the pattern of victimization and crime among street children in West Jakarta, because street children phenomena has become an important social problem that should be overcome by the government of DKI Jakarta.

The method occupied to conduct this research was survey method, interviewing 20 on the street children and 20 off the street children.

Research result reveal that the tendency of the street children conducted deviant behavior motivated by their own desire, whilst their victimization pattern mostly physical as well as sexual harassment.
