Abstrak

This thesis is about the strategy to prevent drugs abuse in Rutan "X", as mentioned openly by news paper and media that even the prisoners is confined in the prison with maximum security, they can be done something attack the rules in prison like drugs abuse.

Research method used in this thesis is Qualitative Descriptive based on routine activity theory proposed by Shaw and McKay, that perspective routine activity has a theory in preventive crime namely the situational preventive crime.

From the research we can know that drugs abuse in Rutan "X" happen because the security is weak be a smugly drugs and narcotic. The scope of the strategy to prevent drugs and narcotic abuse focused onto reduce possibility that national prison become the target of drugs smuggling (to reduce supply) by conducting the situational approach.
