

Evaluasi kinerja simpang tak bersinyal antara jalan Sultan Hamengkubuwono 9 dan jalan Cakung Cilincing Raya

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=116447&lokasi=lokal>

Abstrak

Unsignalize intersection is very effective because it has less average delay compare to signalize intersection.. But when the traffic volume getting higher the capacity of unsignalize interaction may not be able to maintain a proper intersection performance.....
