

Grafting asam metakrilat pada silika sekam padi dan pemanfaatannya sebagai penukar ion

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=118755&lokasi=lokal>

Abstrak

This study was carried out with the main purpose to investigate the grafting of methacrylic acid (MAA) on silica extracted from rice husk and to test the capability of the grafted silica to adsorb Cu^{2+} from aqueous media.....
