

Structural characterization of tungsten oxides supported on titanium silicalite

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=118846&lokasi=lokal>

Abstrak

Titanium silicalite (TS-1) is known as an active material catalyst in the epoxidation reaction. In this study tungsten oxides (WO) with various loading amount have been supported on the TS-1 to increase of the catalytic activity of the TS - material....
