

Aktivitas antimikroba flavonoid -glikosida hasil sintesis secara transglukosilasi enzimatis [Antimicrobial activity of Synthesized Flavonoid-Glycoside through enzymatic Transglycosylation]

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=119637&lokasi=lokal>

Abstrak

Flavonoid -glycoside was synthesized enzymatically using CGT-ase (EC.2.4.1.19) of indigenous *Bacillus licheniformis* in a phosphate buffer pH6.0 at 45oc for 24 h, through transglycosylation in the presence of flavonoid those were extracted from rhizomes such as ginger,...
