

Tanggap beberapa species legum penutup tanah terhadap pemberian mikoriza, rhizobium, asam humat dan mekanisme fisiologi toleransi terhadap cekaman aluminium

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=120202&lokasi=lokal>

Abstrak

The research was aimed to study the responses of plant growth and nutrient level to the application of humic acid, mycorrhizal fungi and rhizobium on acid and high Al level of growth media, and their relationship to the adaptability LCC species through physiological mechanism of tolerance to Al stress.....
