

Pengembangan dan perbandingan dua metode lengkung intensitas durasi frekuensi (IDF) untuk lokasi dengan ketiadaan data hujan durasi pendek

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=121063&lokasi=lokal>

Abstrak

In the urban drainage design, people usually use the Intensity Duration Frequency to estimate Short Duration Design Rainfall. Problems shall arise when short duration data from Automatic Rainfall Recorder are not available in the study area....
