

Bandwith enhancement of microstrip slot antennas using array technique

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=121350&lokasi=lokal>

Abstrak

This paper proposes microstrip slot antenna fed by matching network of microstrip line to increase widebandwidth. The microstrip line composed of multi tuning stubs is used to control slots antenna's real impedance to match with the impedance characteristic of feeding line so that it could enhance the bandwidth....
