

Impact of control structures on assimilative capacity of rivers and fish habitat

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=121897&lokasi=lokal>

Abstrak

The research studies the impact of water level control structures on self-assimilative capacity of rivers and on fish habitat. Constructing a water level control structure in a river reach will alter its hydraulics as well as its water quality, thermal regime and fish habitat....
