

vaksinasi dini bordetella bronchiseptica pada anak babi mencegah kerusakan sel-sel eptel berbulu getar pada mukosa saluran nafas bagian atas [Early vaccination of bordetella bronchiptica to sucking piglets in protecting the damarge of ciliated cells of upper respiratory tract mucous]

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=121989&lokasi=lokal>

Abstrak

The upper respiratory tract is lined with ciliated epithelium or brush border that functions as the primary filter to the respiratory tissue. Epithelial trauma caused by neonatal boedetellosis serves as the predisposing factor for other respiratory diseases in growing pig....
