

Earth gravitational model 2008 (EGM) 2008) di Indonesia

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=122215&lokasi=lokal>

Abstrak

Geoid is one of earth shape approximations with a field that has similar potential value. Geoid is used as reference to measure level of vertical height. There are two ways of obtaining geoid and these are using the levelling measurement combined with GPS measurement and using the existig formulas or methods....
