

Fitoekstraksi sianida pada *Centrosema pubescens* benth yang tumbuh di Limbah Tailing terkontaminasi sianida

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=122243&lokasi=lokal>

Abstrak

Contamination of mined soil and water affects not only to agriculture system but also food chains and epidemiological problem. As soil metal can not be biodegraded, remediation of soil heavy metal risks has been a difficult and expensive goal....
