

Kandungan dan kelarutan mineral pada cumi-cumi loligo dan udang vannamei *litopenaeus vannamei*

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=122775&lokasi=lokal>

Abstrak

This experiment was carried out to study the mineral contents and their profile on seafood which is generally consumed i.e squid (*Loligo sp*) and vannamei shrimp (*Litopenaeus vannamei*), and to evaluate the solubilities of Ca dan Zn as affected by boiling in different solution (water , 0.5% acetid dan 1% sodium chloride)...
