Abstrak

Pelayanan merupakan tugas utama sebuah organisasi pemerintahan tidak terkecuali dengan Departemen Komunikasi dan Informatika. Biro Kepegawaian dan Organisasi merupakan satuan kerja di bawah unit Sekretariat Jenderal Departemen Komunikasi dan Informatika. Berdasarkan Peraturan Menteri Komunikasi dan Informatika nomor 25/P/M.KOMINFO/7/2008 tentang Organisasi dan Tata Kerja Departemen Komunikasi dan Informatika, salah satu fungsi yang diselenggarakan oleh Biro Kepegawaian dan Organisasi yaitu penyelesaian masalah-masalah kepegawaian. Dalam menyelesaikan masalah kepegawaian, pengetahuan dan pengalaman seorang pegawai sangat dibutuhkan sehingga diperlukan sebuah knowledge management system untuk mengelola dan mendistribusikan pengetahuan serta pengalaman tersebut kepada pegawai lainnya agar pelayanan prima pun dapat terwujud. Penelitian ini bertujuan untuk menghasilkan sebuah rancangan model knowledge management system yang sesuai dengan kondisi Biro Kepegawaian dan Organisasi dalam mewujudkan pelayanan prima melalui analisis dan perancangan prototipe dari model yang dikembangkan. Model knowledge management system dihasilkan dari analisis faktor-faktor kontingensi yang kemudian dipetakan ke dalam SECI model dari Nonaka dan Takeuchi. Model knowledge management system yang dikembangkan pada Biro Kepegawaian dan Organisasi sesuai dengan tugas pokok dan fungsinya termasuk ke dalam penangkapan pengetahuan yaitu melalui proses internalisasi dan eksternalisasi. Aplikasi dari model knowledge management system dapat digunakan untuk mengevaluasi model tersebut serta diperlukan strategi dalam pengimplementasiannya. Database knowledge management system dapat.
