

Studi numerik karakteristik aliran silang pada silinder bundar tunggal

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=127053&lokasi=lokal>

Abstrak

This study deals with numerical investigation of hydrodynamic properties of fluids flow across a single circular cylinder. The flow is assumed incompressible, laminar with Reynolds number 0,0001, 2,20, 100,200,400,1000,4000 and 20000....
