

Identification and mapping of a gene for rice slender kernel using oryza glumaepatula introgression lines

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=127189&lokasi=lokal>

Abstrak

World demand for superior rice grain quality tends to increase. One of the criteria of appearance quality of rice grain is grain shape. Rice consumers exhibit wide preferences for grain shape but most Indonesia rice consumers prefer long and slender grain....
