

Effects of light illumination alteration on chlorella vulgaris buitenzorg's CO₂ fixation in bubble column photobioreactor

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=127855&lokasi=lokal>

Abstrak

Cultivation of chlorella vulgaris buitenzorg with alteration of light illumination using a maximum carbon dioxide transfer rate (CTR) base curve successfully enhanced the CTR value up to 1.74 times compared to alteration of light illumination with a growth base curve....
