

Use of the black tiger shrimp, *penaeus monodon* , as test organism for toxicity testing in tropical marine environments

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=127925&lokasi=lokal>

Abstrak

In the response to the need for the development of biological assays for toxicity testing in tropical marine environments, the study explored the potential of the marine Black Tiger shrimp, *Penaeus monodon*, as a test organism for toxicity testing specially on the following: (a) standardization of laboratory conditions (b) determination of the appropriate larval stage for use in toxicity testing...
