

Interspecific genetic variation and phylogenetic relationships of six members of the genus *allium* L. (Alliaceae) in the Philippines inferred from RAPD-PCR and morphometrics

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=127936&lokasi=lokal>

Abstrak

The relationships among *allium* L. species remain complex. Certain species belonging to the genus *allium* are medically and economically important and as such merit phylogenetic analysis....
