

Hubungan status dan konsumsi gizi sebagai comsumtive behavior sosial ekonomi terhadap besaran indeks DMFT

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=128699&lokasi=lokal>

Abstrak

Based on house hold survei in 2001 it showed that the community behavior in maintaining dental health was still low . The dental condition of the people who complained of having dental problem was very bad , which was shown by the fact that from out of 6-7 teeth which were in bad condition, 4-5 teeth had already been pulled out....
