

APRI index change after 4 weeks treatment of pentoxifylline in chronic hepatitis B

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=128774&lokasi=lokal>

Abstrak

Nowadays studies have shown that liver fibrosis is a reversible process. Therapeutic target on Hepatic Stellate Cell (HSC) through inhibition of fibrotic signaling transduction is one of the way to treat liver fibrosis (e.g. pentoxifylline)...
