

Karsinoma Nasopharynx dan infeksi EBV di Indonesia ; analisis aspek klinis, patologi dan Biomolekular

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=128792&lokasi=lokal>

Abstrak

Nasopharyngeal carcinoma (NPC) is a unique epithelial malignancy that occurs at a high frequency in certain regions of Southeast Asia. Previous study revealed the association between Epstein Barr Virus (EBV) and to a lesser extent, Human papiloma Virus (HPV) with NPC....
