

Fraksi heksan dan fraksi metanol ekstrak biji pepaya muda dapat menghambat spermatid mencit jantan (*Mus musculus*)

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=128795&lokasi=lokal>

Abstrak

Hexane fraction of unripe papaya seed extract contains glycosides, alkaloid and triterpenoids, which is assumed to have an anti fertility effect, so it can be used as a male contraception, although the mechanism of action is not yet clear....
