

Peningkatan sifat mekanik bahan struktur paduan aluminium fero nikel dengan penguatan fasa kedua dan struktur butir

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=128812&lokasi=lokal>

Abstrak

Mechanical properties enhanced of the nickel ferro aluminium alloy with second phase reinforcement and grain structure. development of AlFeni alloy for fuel cladding structure material was done as anticipation of the hight density fuel development for research reactor to balance the fuel hardness...
