

Tinjauan mikrostruktur, struktur kristal dan kistalit pertumbuhan fasa Mg₂ Al₃ hasil mechanical alloying

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=128978&lokasi=lokal>

Abstrak

Microstructure , crystal structure, and grain size observations on the Mg₂ Al₃ growth by mechanical alloying. Microstructure , crystal structure, and grain size observations on the growth of Mg₂ Al₃ phase by mechanical alloying have been performed. The Mg₂ Al₃ compound is prepared by milling process at various milling time of 10,20 and 30 h...
