

Peluang pengembangan feromon seks dalam pengendalian hama ulat bawang (*Spodoptera exigua*) pada bawang merah

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=129116&lokasi=lokal>

Abstrak

The main constraint in shallot cultivation is the high incidence of *Spodoptera exigua*. The pest causes significant damage on plant. To control the pest, farmers commonly use insecticides excessively. The intensive use of insecticides results in inefficiency and polluted environment...
