

Kinetic evaluation ethanol - tolerant thermophile geobacillus thermoglucosidasius M 10 Exg for ethanol production

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=129125&lokasi=lokal>

Abstrak

Thermophiles are challenging to be studied for ethanol production using agricultural waste containing lignocellulosic materials rich in hexose and pentose. These bacteria have many advantages such as utilizing a wide range of substrates, including pentose (C5) and hexose (C6)....
