

Pemecahan integral pocklington menggunakan metoda momen untuk menentukan besaran antenna batang

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=129410&lokasi=lokal>

Abstrak

this research yields a computer program to compute the measurement of a thiwire antenna parameters which are current distribution, antenna impedance, and radiation pattern. The computation is based on the solution of pockklington equation, solved by moment method....
