

Analisa pengaruh besar area hotspot dan interferensi pada wlan IEEE 802.11b

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=129414&lokasi=lokal>

Abstrak

Wireless LAN (WLAN) technology was designed with conceptually simple radio data communication for limited area with resources that have many compromise. The use of licence freeISM frequency of 2.4 GHz adding limitation in the already compromised technical design, which inturn will affect its performances....
