

Keragaan kualitatif klon kentang (Go) dari stek mini dalam rumah ketat serangga

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=129464&lokasi=lokal>

Abstrak

The purpose of the research is to investigate the phenotypic performances as qualitative assessment characters of three potato clones resulted from protoplasm fusion (A5) and two clones from botany sedds (PAS3063 and PAS3064) which had been identified to be resistant from bacterial wilt disease (*Ralstonia solanacearum*)....
