

Eksplorasi habitat bakung putih (*Crinum asiaticum* L) untuk mendapatkan kadar galantamin pada ketinggian tempat berbeda

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=129469&lokasi=lokal>

Abstrak

White lily, *crinum asiaticum* L (Amaryllidaceae) produce secondary metabolite called galantamine which has been developed to cure alzheimer disease. The purpose of this research was to explore the habitat of *C. asiaticum* which produces a high yield of galantamine. The bulb of asiaticum from four different locations which has altitudes ranging from 0-1250 meters above sea level was taken....
