

Rancangan penyangga pada bengkokan pipa

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=129552&lokasi=lokal>

Abstrak

In a plant , a piping system is one of the most important part is used to drain fluid. The insalled piping system must comply with codes and standards defined so that the burden of what happened at the time of surgery or death situation either static or dynamic load does not exceed the limits of such codes and standards....
