

kalkulasi dasar termodinamika pada turbin uap kapasitas 3600 KW

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=129636&lokasi=lokal>

Abstrak

Basic calculation of thermodynamic in steam turbine has done. Basic calculation of thermodynamic for determine thermodynamic that happened on each stage impuls turbine. From this basic calculation can be known the total of steam on the turbine and diameter average on moving blade for fourt stage turbine.
