

Hubungan sipil - Militer bagi kesejahteraan rakyat

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=131460&lokasi=lokal>

Abstrak

There are two different perspectives on the relationship between civil society and military : (1) military is seen as an output of historical processes of military demands and situation and (2) military interventions into politically strategic positions were obstacles for civil society to achieve the position and undermined their opportunities. The dichotomization of military - civil society may be minimized by forming a certain policy intended to improve the welfares of civil society and military.
