

Pemodelan Mini Http Server Untuk Sensor Network

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20178034&lokasi=lokal>

Abstrak

Abstrak A Sensor network is an infrastructure camprised of sensing, camputing and communications elements that made on the single board. Themo modeling of simple http server in this research used Z80 Emulator with assembly and Simili Simulator with VHDL(VHSIC Hardware Descriptions Language). The simple http server designeg for internet connection without perating system...
