Abstrak

Indikator sosial dari program pengembangan bahan bakar nabati merupakan ukuran keberhasilan program tersebut, terutama program jangka pendeknya yaitu percepatan pengurangan angka kemiskinan dan pengangguran. Indikator sosial dapat menerjemahkan prioritas pembentukan opini maupun pelaksanaan program jangka pendek pengembangan bahan bakar nabati.

Indikator sosial dikelompokkan dalam tiga klaster yang merupakan turunan dari strategi triple track yang dirumuskan pemerintah dan hasil studi literatur yang dirancang dengan focus group discussion dengan para pakar. Indikator sosial yang dirancang berisi 14 kriteria yang pembobotan kepentingannya menggunakan Analytic Network Process.

.....Social indicators of biofuel development programs are very important as success measurement of these programs, particularly in short-term program of accelerated poverty and unemployment reduction. Social indicators can translate the priorities of opinion formation and implementation of short-term program development of biofuels.

Social indicators are grouped into three clusters that are derived from triple-track strategy that are formulated by the government and literature studies that are designed by focus groups discussion with experts. Social indicators that are designed containing 14 criterias with the weightings of importance using Analytic Network Process.
