Abstrak

This article is shaped on the empirical facts of domestic violence phenomenon and many local peoples who have not been acquainted with the conceptions of domestic violence. The author is launching a suggestion to do socialization through Law No. 23 of 2004, regarding Elimination through Domestic Violence in integrally and institutionally methods. By the socialization then will be reconstructed the new order of social norms which can be convicted that domestic violence is not in spousal only but has become public spheres. Also that domestic violence is as mis-conduct that needs to be criminalized. In the author's thoughts it has broken rules of human rights that have been promulgated in amended UUD 1945, Law No. 7 of 1984 on the Ratification Convention On The Elimination Of All Forms Of Discrimination Against Women and Law No. 23 of 2004 itself.
