Abstrak

Skripsi ini membahas pengaruh karakteristik individu dokter dan petugas pengembali berkas rekam medis (pos perawatan) terhadap mutu berkas rekam medis pasien rawat inap di Rumah Sakit Haji Jakarta Tahun 2011. Tujuan penelitian ini adalah untuk mengetahui bagaiman Penelitian ini merupakan penelitian deskriptif kuantitatif dengan studi cross sectional. Berdasarkan hasil penelitian, diketahui bahwa mutu berkas rekam medis kategori baik jumlahnya lebih rendah dibandingkan yang kategori mutunya tidak baik. Sementara itu diketahui bahwa tidak ada perbedaan proporsi yang signifikan antara karakteristik individu dokter dan petugas terhadap mutu berkas rekam medis. Disarankan untuk melakukan pengujian terhadap variabel non karakteristik individu yakni variabel organisasi dan psikologis yang secara teori efeknya langsung mempengaruhi kinerja.
