

Identifikasi Permasalahan pada Faktor Internal yang mempengaruhi Kinerja Perusahaan Jasa Konstruksi di Indonesia

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20304055&lokasi=lokal>

Abstrak

In improving Indonesia construction companies' ability to compete, anticipative steps by determining various improvements and corrections in construction companies are needed to increase the company's quality performance. Several factors that influence and determine the success of a construction company can be grouped into internal factors, external factors, and market forces. Internal factors in a company are important factors and have the effect of approximately 42% towards the company's success. Management equipment, human resources, corporate culture and finance dominate the internal factors' influence towards the success of a construction company. The research goal discussed in this paper is to identify the problems that arise in a construction company's internal factors that influence the company's success performance in Indonesia. The methods used are literature studies and survey for identifying the problems and the construction company's success performance indicators. The analysts method used in this research is statistical analysis. The results show that problems in internal factors which have significant influence to decrease construction company's performance are the management and human resources factors.
