Abstrak

Tesis ini membahas rujukan kasus kegawatdaruratan Obstetri Neonatal oleh Bidan Desa ke Puskesmas mampu PONE di Kabupaten Bogor. Penelitian ini adalah penelitian kualitatif. Hasil Penelitian menyarankan bahwa setiap bidan desa harus tinggal di desa dan mendapatkan pelatihan APN dan PPGDON; puskesmas harus membuat sosialisasi dan pembinaan khusus untuk kegiatan PONE; Dinas Kesehatan harus memenuhi kebutuhan Sumber Daya Manusia (SDM) khusus untuk petugas PONE melalui mutasi dan promosi yang tepat; memenuhi kebutuhan sarana dan pembinaan terjadwal secara rutin; membuat penilaian kinerja Puskesmas mampu PONE sebagai tolak ukur keberhasilan kegiatan PONE di Kabupaten Bogor; memberikan bantuan biaya transportasi kepada masyarakat miskin yang akan dirujuk.

.....

The focus of this study is the referral case of an obstetric and neonatal emergency by village midwives to the PONE preliminary health Center in Bogor District. This research is a qualitative study. This study results come up with some suggestions. Every midwife need to stay in the rural district and get the training PPGDON and training APN; PHC should make some socialization and coaching program related to PONE activities; Health Department in Bogor must fulfill the need of PONE human resources by some mutation and promotion; in addition, the supervision facility and observation need to be scheduled regularly; some indicator of success have to be developed in order to measure the PONE performance effectively; besides, the cost of transportation also should be allocated to protect the poor.
