Abstrak

Tesis ini membahas rujukan kasus kegawatdaruratan Obstetri Neonatal oleh Bidan Desa ke Puskesmas mampu PONED di Kabupaten Bogor. Penelitian ini adalah penelitian kualitatif. Hasil Penelitian menyarankan bahwa setiap bidan desa harus tinggal di desa dan mendapatkan pelatihan APN dan PPGDON; puskesmas harus membuat sosialisasi dan pembinaan khusus untuk kegiatan PONED; Dinas Kesehatan harus memenuhi kebutuhan Sumber Daya Manusia (SDM) khusus untuk petugas PONED melalui mutasi dan promosi yang tepat; memenuhi kebutuhan sarana dan pembinaan terjadwal secara rutin; membuat penilaian kinerja Puskesmas mampu PONED sebagai tolak ukur keberhasilan kegiatan PONED di Kabupaten Bogor; memberikan bantuan biaya transportasi kepada masyarakat miskin yang akan dirujuk.

.....

The focus of this study is the referral case of an obstetric and neonatal emergency by village midwives to the PONED preliminary health Center in Bogor District. This research is a qualitative study. This study results come up with some suggestions. Every midwife need to stay in the rural district and get the training PPGDON and training APN; PHC should make some socialization and coaching program related to PONED activities; Health Department in Bogor must fulfill the need of PONED human resources by some mutation and promotion; in addition, the supervision facility and observation need to be scheduled regulary; some indicator of success have to be developed in order to measure the PONED performance effectively; besides, the cost of transportation also should be allocated to protect the poor.
