Abstrak

ABSTRAK

Model Praktik Keperawatan Profesional merupakan suatu penataan dalam pemberian asuhan keperawatan, yang bertujuan untuk meningkatkan mutu pelayanan kesehatan. Penelitian ini bertujuan mengetahui gambaran penerapan MPKP menurut persepsi perawat pelaksana di RSUP Fatmawati Jakarta.

Penelitian ini menggunakan metode penelitian deskriptif. Sampel penelitian berjumlah 102 responden yang diambil menggunakan teknik Disproportionate Stratified Random Sampling. Hasil penelitian menunjukkan persepsi perawat mengenai ketenagaan masih kurang, jenis tenaga keperawatan tidak efektif, standar rencana perawatan efektif, pengelolaan metode pemberian askep tidak efektif, nilai-nilai profesional baik, hubungan profesional baik, pendekatan manajemen baik, serta sistem kompensasi dan penghargaan seimbang.

ABSTRACT
