Abstrak

Skripsi ini membahas tentang pelaksanaan manajemen risiko keselamatan Terminal Petikemas Koja (TPK Koja) bulan Juni 2012 pada area operasional. Penelitian ini adalah penelitian semikuantitatif dengan desain penelitian observatif analitik. Metode yang digunakan menggunakan formula perhitungan pada setiap variabel yang dipakai untuk menilai gambaran pelaksanaan manajemen risiko.

Hasil penelitian menyarankan bahwa TPK Koja perlu meningkatkan kinerja dalam pelaksanaan manajemen risiko; memperbaharui rancangan manajemen risiko mereka; serta menyiapkan sumber daya yang mumpuni dalam pelaksanaannya

This Thesis discusses about the implementation of safety risk management in operational area of Terminal Petikemas Koja (TPK) on June, 2012. This research is semi quantitative with observational analytical design. The developed method that is used in this research is using the formula of calculation of each variable for measuring implementation of risk management.

The results of this research suggest that TPK needs to improve the performance of implementation of safety risk; recondition of risk management design and provide the qualified resource in implementation.
