Abstrak

Skripsi ini membahas mengenai formulasi retribusi pengendalian menara telekomunikasi di Kota Depok. Maraknya pembangunan menara telekomunikasi mengurangi estetika kota, sehingga pemerintah melakukan berbagai upaya untuk mengatasinya. Salah satu upaya yang dilakukan oleh pemerintah adalah menambahkan satu jenis retribusi pada Undang-Undang Nomor 28 Tahun 2009 yaitu retribusi pengendalian menara telekomunikasi.

Hasil penelitian yaitu formulasi kebijakan melewati beberapa tahapan yaitu identifikasi masalah, agenda kebijakan, formulasi kebijakan, dan mendesain kebijakan. Faktor-faktor penghambatnya adalah perbedaan pendapat diantara para tim perumus kebijakan dalam menentukan regulasi persyaratan teknis menara telekomunikasi dan regulasi menara yang sudah berdiri sebelum tahun 2011.

.....This undergraduate thesis is talking about the formulation of telecommunication tower controlling charges in Depok City. The vast growing of telecommunication tower constructions is reducing aesthetics of the city so that the government makes many efforts to solve this problem. One of the efforts that has been made by the government is adding a new charges called telecommunication tower controlling charges on Indonesian Republic Laws of Local Tax and Local Retribution Number 28 Year 2009.

The result obtained in this research are the policy was formulated through several stages, namely: the identification of problems, agenda setting, public policy formulation, and policy design. The inhibitors factor are the differences among the policy makers in determining the technical requirements of telecommunications tower regulation and the previous regulation about towers that have been built before 2011.
