Abstrak

Kecelakaan kerja menyebabkan terhentinya proses bekerja. Kondisi tidak aman di tempat kerja, atau praktik yang tidak aman dari sesama karyawan, dapat mengganggu orang dan merusak kinerja mereka. Salah satu upaya perusahaan dalam mencegah terjadinya kecelakaan adalah dengan melakukan safety inspection. Skripsi ini membahas tentang evaluasi pelaksanaan safety safety inspection di area kerja drilling oleh PT. Surveyor Indonesia – Drilling & Completion Safety Compliance Audit pada tahun 2012. Penelitian ini merupakan penelitian semi kuantitatif. Untuk melakukan evaluasi, digunakan International Safety Rating System edisi ke-enam tahun 1996, yaitu elemen ketiga mengenai safety inspection. Kerangka konsep penelitian ini diambil dari variabel-variabel yang ada pada ISRS. Secara keseluruhan hasil penilaian safety inspection di PT. Surveyor Indonesia – DCSCA adalah 100 %, bahwa semua sasaran, target, serta pelaksanaan safety inspection sudah sesuai dengan elemen-elemen yang ada dalam International Safety Rating System.

.....Workplace injury causes the cessation of the work process. Unsafe conditions in the workplace, or unsafe actions from the workers, could disturb and damage the work performance. One of the company's efforts to prevent accidents in to do a safety inspection program. This thesis discusses the evaluation of the safety inspection in area of work drilling by PT. Surveyor Indonesia- Drilling & Completion Safety Compliance Audit in 2012. This research is a semi-quantitative. To perform the evaluation, use the International Safety Rating System (ISRS) the sixth edition 1996, the third element of the safety inspection. Conceptual framework were taken from the variables that exist in the ISRS. Overall, of safety inspection at PT. Surveyor Indonesia - DCSCA is 100%, that all goals, targets, and implementation of safety inspection is in accordance with the elements that exist in the International Safety Rating System.
