

Pengembangan masyarakat sebagai upaya pencegahan kejahatan di wilayah pengembangan jembatan Surabaya - Madura (aplikasi community development crime prevention)

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20333854&lokasi=lokal>

Abstrak

This research was an overview about the crime prevention program following the implementation of Suramadu Bridge. The Crime Prevention Program occurs there are conducted by the police and Badan Pengembangan Wilayah Suramadu. This research starts when mass media publication exposed a lot of criminalities occurred around Suramadu Bridge after it established. The purpose of this research is to find out the effective way of crime prevention to be implicated there. This research uses qualitative method with descriptive design which the data is obtained through the process of interviewing and observation on the field. This study concludes that community development and crime prevention should be run at its best. This is very important for the future, simple crime won't be a social problem.
