Abstrak

Tesis ini membahas hubungan literasi informasi dengan publikasi hasil penelitian peneliti di Pusat Penelitian Bioteknologi - LIPI. Penelitian ini adalah penelitian kuantitatif dengan desain deskriptif. Hasil penelitian menyarankan bahwa peneliti khususnya di lingkungan Pusat Penelitian Bioteknologi - LIPI lebih mengeksplorasi dan mengembangkan kemampuan literasi informasi; pengembangan strategi organisasi berupa pembuatan program literasi informasi; perlunya keterlibatan perpustakaan dalam kegiatan literasi informasi.

<hr>

The focus of this study is analyzing the relationship between researchers' information literacy with publications of research results that existed at the Research Center of Biotechnology - LIPI. The type of this research is a quantitative study with descriptive approach. The results suggest that researchers, especially in the Biotechnology Research Center - LIPI to explore and develop information literacy skills; construct organizational strategies such as information literacy programming; involvement of the library in information literacy activities.
